How to Clean Roller Shades

Things You Will Need:

- Vacuum brush
- Clean Soft Rag or Gentle Sponge
- Dry Feather Duster

Roller shades are a time-tested window treatment that is both durable and functional. Regular dusting and occasional vacuuming will keep your shades looking new. We recommend periodic dusting with a dry feather duster or light vacuuming with the brush attachment on your vacuum.

For some of the vinyl fabrics, you can wipe off dirt or stains with a damp sponge or soft cloth. Clean regularly and you will always maintain the original long-lasting beauty.

Always use care when cleaning any window covering product. Damage, stains or discoloration to cords, chain, ladder, slats, tubes, fascia/valance, headrail, tilt rod, hardware or any part of the window covering resulting from regular maintenance, cleaning or operation will not be covered under the manufacturer's warranty.
